

TOSHIBA BIPOLAR LINEAR INTEGRATED CIRCUIT SILICON MONOLITHIC

**TA7343AP****FM PLL MPX**

The TA7343AP is PLL FM stereo multiplex IC.  
It is suitable for automotive applications and portable radio applications because of space merit by the package and wide supply voltage range.

**FEATURES**

- Excellent stereo LED sensitivity  
:  $V_L(ON) = 9mV_{rms}$  (Typ.)
- Suitable for LED driving :  $I_{LED} = 20mA$  (Max.)
- Recommendable input voltage range  
:  $V_{in} = 200\sim 700mV_{rms}$
- Operating supply voltage range :  $V_{CC} = 3.5\sim 12V$
- Excellent channel separation through entire audio frequency range :  $Sep = 45dB$  (Typ.)
- Low distortion :  $THD = 0.08\%$  (Typ.) at  $V_{in} = 200mV_{rms}$  (Stereo)
- Built-in compulsive monaural function. (The VCO is stopped when the pin⑦ is connected with the power supply line, and then the stereo indicator is turn off.)
- Easy adjustment (The monitored free running frequency of VCO is 38kHz at pin⑥.)

- TOSHIBA is continually working to improve the quality and the reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to observe standards of safety, and to avoid situations in which a malfunction or failure of a TOSHIBA product could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent products specifications. Also, please keep in mind the precautions and conditions set forth in the TOSHIBA Semiconductor Reliability Handbook.
